

XSPONSE · EMAIL CAMPAIGN

COPS SVPP Grant — 5-Email Drip

Audience: district leaders & safety/emergency-ops directors plus law enforcement (police chiefs, sheriffs, SRO supervisors) — the people who can lead a direct SVPP application. Goal: drive contact with the XSponse grant team and webinar sign-ups. Cadence: ~3 weeks, Day 0 → Day 22.

Primary CTA: grants@xsponse.com (grant funding). Secondary CTA: XSponse Grant Funding Webinar (xsponse.com/grant-webinar — placeholder; swap real link/date). Personalization: [First Name], [District]. 3 subject options per email for A/B testing.

Email 1 — Awareness — funding your district can apply for directly

Send timing	Day 0 (launch)
Goal	Awareness — funding your district can apply for directly

SUBJECT LINE OPTIONS

- Up to \$500K to make your schools safer — apply directly
- The SVPP grant: federal funding your district can apply for itself
- Don't wait on your state — this school-safety grant comes straight to you

Preview text: *The COPS SVPP grant funds the cameras, locks, and alerts schools need most.*

BODY

Hi [First Name],

When an emergency happens on campus, seconds matter.

Yet many schools still rely on disconnected cameras, access control systems, notifications, and response procedures that weren't designed to work together.

The good news? The DOJ's School Violence Prevention Program (SVPP) provides up to \$500,000 in funding for evidence-based security technology and law-enforcement coordination that districts and law enforcement agencies can apply for directly.

There are roughly 200 awards each cycle and about \$73 million available nationally.

It funds the things that protect students in the moments that matter:

- Security cameras, locks, and access control
- Panic buttons and mass-notification systems
- Expedited notification that alerts police faster
- Coordination and interoperability with local law enforcement

The districts that start planning early are often the most competitive applicants.

Email 2 — How it works — eligibility, match & microgrants

Send timing	Day 4
Goal	How it works — eligibility, match & microgrants

SUBJECT LINE OPTIONS

- Does your district qualify for the SVPP grant? (Most do)
- SVPP in 5 minutes: who applies, the match, and microgrants
- The part of SVPP most districts get wrong

Preview text: *Districts and law enforcement apply directly — here's what to know.*

BODY

Hi [First Name],

Unlike other school-safety grants, your district can apply directly.

Here is a quick guide to how the SVPP grant actually works — because the mechanics shape what you do next.

- You apply directly. Public school districts, school boards, and law enforcement agencies are all eligible primary applicants. (Individual and private schools can benefit as sub-recipients of a district or city application.)
- The award. Up to \$500,000 in federal share, over a 36-month period.
- The match. A 25% local cash match applies to standard awards — but it can be waived for demonstrated severe financial need.
- Microgrants. Requests of \$100,000 or less for rural, tribal, and low-resourced schools are 100% federally funded — no match at all.
- Two-step application. You'll submit standard forms on Grants.gov, then the full narrative and budget in DOJ's JustGrants system.

The takeaway: this funding is within reach for districts of every size — and the ones that prepare early are the ones that win.

Email 3 — What it funds + the XSponse fit

Send timing	Day 9
Goal	What it funds + the XSponse fit

SUBJECT LINE OPTIONS

- School Safety Projects the SVPP Funds (it's more than you think)
- What SVPP will (and won't) pay for
- One platform that fits SVPP's allowable categories

Preview text: *Map your security gaps to fundable, evidence-based technology.*

BODY

Hi [First Name],

SVPP funds "hard" security — evidence-based technologies that help schools prevent, detect, and respond to threats faster. That's where XSponse fits. Our platform brings together the systems schools rely on during an emergency, helping staff and first responders act faster and more effectively:

- Deterrents (locks, cameras) → X-Detect & X-Protect: unified video and access control with instant, automated lockdowns
- Expedited notification → X-Alert & X-Announce: panic activation and mass notification with 911 support
- Law-enforcement coordination → X-Guardian & X-Integrate: interoperable, predefined response workflows
- Visitor screening & entry control → access control and visitor management that hardens every entry point

One important note: SVPP does NOT fund facial recognition, license-plate readers, body cameras, or vehicles. XSponse doesn't rely on facial recognition or LPR, so a deployment stays inside allowable costs — and because XSponse works with many of the systems schools already own, districts can often improve safety and coordination without replacing their entire infrastructure, which means your costs stay reasonable.

Email 4 — What wins awards — best practices & urgency

Send timing	Day 15
Goal	What wins awards — best practices & urgency

SUBJECT LINE OPTIONS

- What separates funded SVPP grant applications from the rest
- Start your SVPP registrations now — here's why
- The 3 things COPS reviewers want to see

Preview text: *Coalition, data, and faster notification — plus registrations that take weeks.*

BODY

Hi [First Name],

SVPP applications that are funded tend to share three things:

- Community support. Partnerships with local law enforcement and emergency responders matter.
- Documented need. Reviewers want to see a clear safety challenge.
- Faster notification. Technology that coordinates automated alerts to 9-1-1 and reduces time-to-police arrival.

And one logistical reality: federal registrations (SAM.gov, Grants.gov, JustGrants) can take weeks to process. Don't wait for the solicitation to open — get registered now so you're ready to apply the day it does.

The XSponse Team

Email 5 — Webinar invite + final CTA

Send timing	Day 22
Goal	Webinar invite + final CTA

SUBJECT LINE OPTIONS

- Join us: turning the SVPP grant into a safer campus
- Free webinar: how to fund school safety with SVPP
- Your shortcut to a competitive SVPP application

Preview text: *A focused session on SVPP eligibility, allowable tech, and application tips.*

BODY

Hi [First Name],

School safety funding opportunities don't come along every day.

The SVPP grant gives districts a rare opportunity to invest in technology that can improve communication, coordination, and emergency response across campus.

Over the past few weeks, we've shared who qualifies, what the grant funds, and what successful applications have in common. If you're considering applying, the easiest next step is to join our free XSponse Grant Funding Webinar.

In a focused session, we'll cover:

- Who's eligible and how the direct-application process works
- What's fundable (and what isn't) — so your budget stays compliant
- How to build a competitive narrative around documented need and faster response
- Live Q&A with our school-safety grant team

It's the fastest way to get your district pointed in the right direction before the FY 2026 window opens.
