

XSPONSE

LinkedIn Campaign — COPS SVPP Grant

Channel: LinkedIn (XSponse company page). 5-post series with organic copy + paid Sponsored Content variants. Each post pairs with a 1200×1200 square graphic (in the /linkedin-svpp folder).

Audience	K-12 district leaders, safety & emergency-ops directors, business officials — plus law enforcement (police chiefs, sheriffs, SRO supervisors), since LE can apply directly. Geo: U.S.
Goal	Drive contact with the XSponse grant team (grants@xsponse.com) and registrations for the Grant Funding Webinar.
Primary CTA	grants@xsponse.com — contact the grant team about funding.
Secondary CTA	XSponse Grant Funding Webinar — https://xsponse.com/grant-webinar (placeholder; swap real link/date).
Cadence	Organic: 2 posts/week over ~3 weeks. Paid: promote Posts 1, 3, and 4 (webinar) as Sponsored Content; A/B test the strongest.
Destination	Most posts → xsponse.com/federal-grant-funding-for-school-safety/ . Webinar post → grant-webinar link. Add UTM tags before running.

Post 1 — Awareness — apply directly

	Paired graphic: svpp_1_500k.png Format: 1200 × 1200 (square) Goal: Awareness — apply directly
--	---

ORGANIC POST COPY

There's a federal grant designed to help schools improve safety on K-12 campuses — and your district can apply for it directly.

The DOJ COPS School Violence Prevention Program (SVPP) awards up to \$500,000 per applicant for evidence-based security technology and law-enforcement coordination. ~200 awards each cycle; ~\$73M available nationally.

It funds what protects students in the moments that matter: cameras, locks, access control, panic buttons, mass notification, and faster alerts to police.

Want to learn how to fund your safety plan? Talk to our grant team or join our free webinar [📄](#)

Post 2 — Eligibility — districts & law enforcement

XSPONSE
WHO APPLIES

Your district applies directly.

Public districts, school boards and law enforcement can lead an SVPP application — no waiting on the state to pass it down.

Districts • Boards • Law enforcement COPS SVPP • STOP School Violence

Paired graphic: svpp_2_apply_directly.png

Format: 1200 × 1200 (square)

Goal: Eligibility — districts & law enforcement

ORGANIC POST COPY

Unlike many school-safety grants, SVPP funds local applicants directly — no waiting on the state to pass it down.

The districts that prepare early with defined projects and budgets are often in the strongest position to compete for funding.

Eligible to lead an application:

- Public school districts & school boards
- Law enforcement agencies (police & sheriffs)

Private and individual schools can still benefit as sub-recipients of a district or city application.

And there's a 25% local match — waivable for hardship, and fully waived for microgrants (≤\$100K) serving rural, tribal, and low-resourced schools.

Not sure where your district fits? Let's talk ☐

Post 3 — What it funds + XSponse fit

XSponse
WHAT SVPP FUNDS

Fundable. Evidence-based

- Locks, cameras & access control
- Panic buttons & mass notification
- Expedited 911 notification
- Law-enforcement coordination
- Visitor screening & entry control

Not facial recognition or LPR COPS SVPP - STOP School

Paired graphic: svpp_3_what_funds.png
Format: 1200 × 1200 (square)
Goal: What it funds + XSponse fit

ORGANIC POST COPY

Before you budget your SVPP request, know what's fundable — and what isn't.

- Funds: locks, cameras & access control · panic buttons & mass notification · expedited 911 notification · law-enforcement coordination · visitor screening
- Does NOT fund: facial recognition, license-plate readers, body cameras, or vehicles

The XSponse Guardian platform maps cleanly to the allowable categories — and because we don't rely on facial recognition or LPR, deployments stay inside allowable costs. We also extend the systems you already own, keeping costs reasonable (a factor reviewers reward).

Post 4 — Webinar — secondary CTA

	Paired graphic: svpp_4_webinar.png Format: 1200 × 1200 (square) Goal: Webinar — secondary CTA
---	---

ORGANIC POST COPY

Federal grants can feel overwhelming. They don't have to be.

The DOJ's School Violence Prevention Program (SVPP) provides up to \$500,000 in funding for school safety technologies and initiatives that help schools improve communication, coordination, and emergency response.

Join our free XSponse Grant Funding Webinar for a focused walkthrough of:

- Who's eligible and how the direct-application process works
- What's fundable (and what isn't)
- How to build a stronger, more competitive application
- Live Q&A with our school safety grant team

Whether you're just getting started or already exploring funding opportunities, this session will help point your district in the right direction before the FY 2026 window opens.

Post 5 — Mission — coordinate, don't scramble

	Paired graphic: svpp_5_coordinate.png Format: 1200 × 1200 (square) Goal: Mission — coordinate, don't scramble
---	---

ORGANIC POST COPY

In a critical event, most schools don't have a technology problem. They have a coordination problem.

Cameras here. Access control there. A call to 911 somewhere else. The seconds lost in those gaps are the ones that matter most.

SVPP was built to close them — funding expedited notification and law-enforcement coordination. XSponse unifies detection, access, alerts, and response into one platform that connects your schools to first responders automatically.

Let's build your plan — and fund it ☐
